As part of 3MDG efforts to combat tuberculosis (TB), 3MDG and the Ministry of Health and Sports have identified specific infrastructure needs in Yangon and Mandalay. Planning photos for the identified facilities, which are being financed by 3MDG and built by UNOPS, can be found below.

1. Yangon Regional TB Outpatient Department (OPD) (Aung San TB OPD)

With laboratory and x-ray rooms, spaces for counselling, a dispensary and medical storage space, the Yangon Regional TB Outpatient Department will improve TB services for patients in Yangon.

2. Bio Safety Level 3 at National TB Reference Laboratory, Yangon

A new Bio Safety Level 3 National TB Reference laboratory is being constructed in Aung San TB Hospital Compound. The facility, funded by 3MDG and with equipment provided by the Global Fund, will improve TB testing facilities for Yangon Region.

3. Caregiver Accommodation at Patheingyi TB Hospital, Mandalay

This facility will accommodate up to 20 people, with separate male and female rooms and toilets and a common kitchen, allowing staff to live close by and provide better and faster care for their patients.

4. Mandalay Regional TB Outpatient Department (OPD)

TB patients in Mandalay Region will have a new facility with emergency rooms, counselling and testing facilities.
