**Notes:**
- This indicator does not need to be matched with 'Anx_Core Indicators' sheet.
- Need to provide justification/background information if deviation from the target.
- Must be relevant to that specific indicator.
- Should be short and precise with complete information at glance.
- Comparative information with previous reporting period achievement.
- Total reported # must be match with 'Anx_Referral' sheet.
- Generally, SBA # will be greater than HFR. And, HF # will be greater than EmOC referrals #.
- Please provide comments if EmOC achievement % is not within 10-20% of expected pregnancy.
- Please provide comments if ECC achievement % is not within 2-5% of under 1 children population.
- For HMIS Diarrhoea & Pneumonia indicator %, if achievement >100%, please check with THD & provide information.
- Need to provide justification/background information if deviation from the target.
- Must be relevant to that specific indicator.
- Should be brief and precise with complete information at glance.
- Comparative information with previous reporting period achievement.
- Total reported # must be match with 'Anx_Referral' sheet.
- Generally, SBA # will be greater than HFR. And, HF # will be greater than EmOC referrals #.
- Please provide comments if EmOC achievement % is not within 10-20% of expected pregnancy.
- Please provide comments if ECC achievement % is not within 2-5% of under 1 children population.
- For HMIS Diarrhoea & Pneumonia indicator %, if achievement >100%, please check with THD & provide information.

**Additional Notes:**
- Please count figures in accordance with '3MDG Indicator guideline'.
- Need to cross check with demographic data (category 39 & 40).
- Need to provide justification/background information if deviation from the target.
- Must be relevant to that specific indicator.
- Should be brief and precise with complete information at glance.
- Comparative information with previous reporting period achievement.
- Total reported # must be match with 'Anx_Referral' sheet.
- Generally, SBA # will be greater than HFR. And, HF # will be greater than EmOC referrals #.
- Please provide comments if EmOC achievement % is not within 10-20% of expected pregnancy.
- Please provide comments if ECC achievement % is not within 2-5% of under 1 children population.
- For HMIS Diarrhoea & Pneumonia indicator %, if achievement >100%, please check with THD & provide information.

---

**Note:** The above figures included are just example given for display. And, the points presented above are also not the complete and comprehensive list, but only the common gaps that usually happen. There may be other points those need to clarify between 3MDG FMO and IP during report review process. Pink boxes are the indicators with revised definition those need to apply starting from 2015 Annual reporting.
